Attorneys for Applicants

Minnesota. During the course of the Litigation certain allegations have been made by Boston Scientific that the above-identified patents are invalid or that they were procured through inequitable conduct or fraud. Certain other arguments have been made by the parties to the Litigation regarding the proper construction of certain terms used in the claims of the above-identified patents. Applicants have previously submitted copies of certain documents generated during the course of the Litigation which contain allegations of the types described above. Applicants are submitting herewith copies of additional documents generated during the course of the Litigation. These documents are set forth on the attached PTO-1449 form and also in the chart set forth below. In order to assist the Examiner with a review of these documents the chart identifies pages or portions of the cited documents which set forth arguments as to the proper construction of claim terms used in the above-identified patents. The reference to these pages or portions of the documents is meant only to assist the Examiner in reviewing the documents by providing a sample of relevant portions and is not meant to be a complete or exhaustive list of all portions of these documents which may be material to the prosecution of the present application. Further, the Litigation includes other documents not cited herein such as, for example, depositions of the inventors, depositions of expert witness and reports of expert witnesses. Applicants, unless these documents are designated confidential and the party that has assigned the designation is unwilling to change their designation, will supply any additional Litigation documents that the Examiner desires to review upon the Examiner's request. The public electronic record and some of the documents from the Litigation can be found at the PACER website (<http://pacer.psc.uscourts.gov>, follow the link to the Minnesota District Court and search for case number 05-651).
